

# World Party's 4<sup>th</sup> Online Conference organized By Karan Rahman.

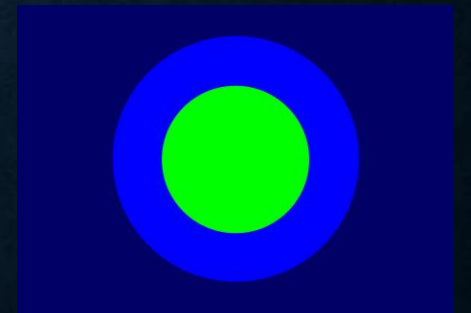

Maj .Dr. Sk.Habibur Rahman  
Vice-President Of World Party

Mr . Toshio Suzuki  
President Of World Party.

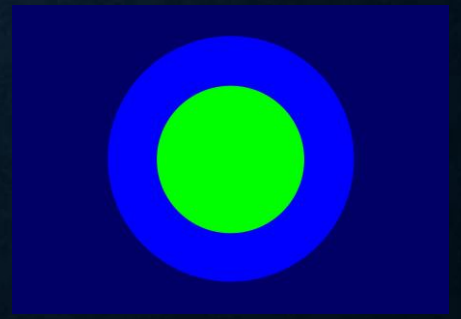

Our honourable president Mr. Toshio Suzuki wrote about poverty, on behalf of him  
I Karan Rahman would like express his respected thoughts to all of you.

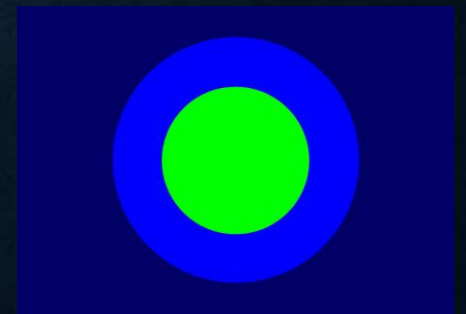

WHY CANNOT THE POVERTY BE ERADICATED AND  
HOW CAN THE POVERTY BE ERADICATED ?

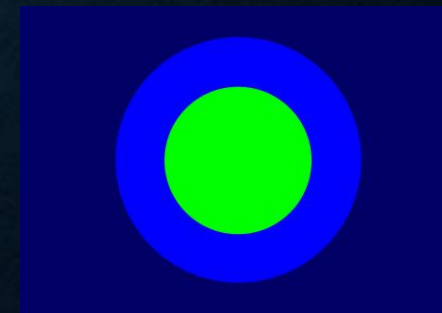

I wish this posting will find you are doing very well. This time, I wrote how we can eradicate the poverty. Basically, poverty exists under the regime of capitalism. In the society of capitalism, competition is free and the property is under the private ownership. As a result, rich people become extremely rich and poor people become extremely poor. For example, it is said that the richest 1 percent of world population has more than 30 percent of asset of world as whole. The poorest people can be called the Industrial Reserve Army. This is the mechanism of capitalism.

We must think how we can eradicate the poverty. In a word, we can eradicate the poverty in the society of communism. In countries like USA, European countries, and Japan, many people think that the communism is bad. This is because people imagine the countries like former Soviet Union and China as the result of communism. Namely, these countries were under the dictatorship. But in the true communism, there is the freedom of expression.

In the countries of communism, jobs are provided even if the job is in the red. Namely, government employ people even if management of firm is in red. As far as the economy is under the capitalism, the Industrial Reserve Army will never disappear. In the future, this will be a common sense even among the non-experts of economics.

Some aspects of society automatically become communistic. For example, even in USA, there is antimonopoly policy. This policy is in a sense communism. As an actual policy for the society without the poverty, we must establish the World Federation with the World Parliament in it. Here, delegates to the World Parliament are elected from each country according to the population. If the World Federation is established, society will automatically become communistic. Next time, I will write the policy of World Party to establish the World Federation.
